Customer Reviews

This book just throws essays at you without any comment on the essays. Certainly there are strengths and weaknesses to each essay and wouldn't presenting those along with the essay be helpful? I think so. Try this book:

http://www..com/Essays-That-Will-Medical-School/dp/1438002742/ref=pd_sim_sbs_b_1?ie=UTF8&refRID=1NYTMJQVE5STRSE8DRZQ

Not that helpful, this is just a collection of personal statements that applicants who've been accepted have used. I think their only criteria for the selection of essays was that the student had been accepted somewhere. I would recommend purchasing books written by medical school consultants who have helped thousands of students get in. They generally present concise advice, what to do, with examples picked to drive home those points.

This book will make you depressed to s*** and wanna give up on dream of medical school. I guess it doesn't realize that everyone takes life at their own pace and makes their own path. If you are a tiger-parented drone though then you don't need it if you are not the deffinetley don't get it since I doubt it will help you unless you want to adapt some of the ideas from their essays.

During my application phase, I was read all of the contained essays which greatly enhanced the brainstorming and ideas for my essay. However my final essay turned out completely different from the ideas within the essays I read, I gained a lot of inspiration and creative ideas from this book.

This book is great! Reading other personal statements and being able to see where the students were accepted to medical school helped me a lot. I would definitely recommend this as a resource to anyone who is applying to med school.

It's the latest edition for Medical School Essays That Made a Difference, has lots of basic information in the beginning of the book which is great for those who are just starting out their PreMed journey. I took off one star because for one applicant who got into a really good school they did not provide an MCAT score & in another page they had the wrong page to refer to for the

schools they were accepted to.
