Plastics Packaging 2E: 'Properties, Processing, Applications And Regulations

Synopsis

This book describes the various aspects of coloring plastics, such as the construction of the processing machine, the processing technology, quality assurance of the raw materials and final products, toxicology of the raw materials, and the legal aspects from handling ingredients during the production of a color preparation to the processing of plastic parts. It also includes the safe use of the products made of plastics in their specific applications. Material properties and how they relate to the chemical structure of the polymers, common processing methods for packaging applications, help with writing specifications, designing, fabricating, testing, and controlling the quality of the plastic materials are covered comprehensively.

Book Information

Hardcover: 448 pages

Publisher: Hanser Publications; Second edition (June 1, 2004)

Language: English

ISBN-10: 1569903727

ISBN-13: 978-1569903728

Product Dimensions: 6.3 x 1.4 x 9.4 inches

Shipping Weight: 2.3 pounds (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars Â Â See all reviews Â (2 customer reviews)

Customer Reviews

The book is well written and easy to understand also for people not directly involved in the food packaging field. Each chapter is developed enough to provide the necessary informations to teach in a class or to solve practical problems at industrial level.

The product came in a good condition and in time as stated in the order confirmation. All information about the book and description of the book condition were very clear and true. For example, only a minor scratch in the cover was stated, which I could not have even seen if not looking so carefully at it. The defect is almost nothing. For me, it is a good seller.
