Customer Reviews

From the guy who knows everything about cutting your reliance on the cable guys, this book zeros in on one method -- using an HDTV antenna. Lots of information, clearly written and obviously won from experience. If you aren't sure what method you are going to use, get the original book -- The CTRL+ALT+Delete Plan.

I had done some research online and so there really wasn't a lot of new material in this book for me. If I hadn't done the research though this really would have helped, and it is still helpful to be able to turn to this for information rather than having to look for it online. Things are presented clearly, easy to understand. There are also links in the book.

Before reading the book, I already invested in a lower priced antenna and wanted to give up because I wasn't picking up as many channels. this book cleared a few things up for me and I'm going to invest in the amplified antenna and set it up properly. this is good stuff if you just want your basic channels without the monthly bill.

I thought I was in a strong local tv signal area this showed me how to verify that. As my computer is already connected to my HDTV and my computer monitor is the only other HDTV in the house it makes my choice simple. By the way, when I designed my house I placed the home office on the other side of the wall that has the main HDTV. I added comcast triple play to get reduced total billing, but, the phone got so many telemarketers I disconnected it and just relied on cell phones that we had any way. I also purchased my own modem that I preferred to comcasts. Seems like I was planning the change all along, I wasn't I just kept deleting poor performing features. I wish there was more discussion on internet only wired service and what I would need to record tv programs. Do I now need a TiVo? This would add considerable expense, perhaps this would be outside the subject

line.

This book added a few more details than the Ctrl+Alt+Del book. I was happy for the additional information. This book covered the setting up of a physical antenna so you can receive over the air, broadcast TV signals.
